

# HUMAN DESIGN SYSTEM

## — Reflections on Reflectors —

BY CAROLYN FORD

**The Human Design System is a blueprint of your genetic code. With Human Design Analysis your genetic code can be deciphered in detail. This system is a revealed science and is founded upon logic, and logic is substantiated upon the repetition of patterns, something to be experimented with, not a belief system. At the moment of birth we are imprinted with a genetic blueprint that is a unique expression of ourselves and like no other. Understanding this can be quite liberating and something inside of us can deeply surrender, allowing our true nature to emerge. It is never too late to begin to live the life that is here for You. It truly is that simple.**

**R**eflectors are the most unusual and rare design of all four types. These beings are actually lunar beings, holding the vibrational energy of the moon on this planet. The other three types; Manifestors, Generators and Projectors, are known as solar beings that originate from the great central Sun. Reflectors represent 1% of the population and play a very precious and unique role for the whole of humanity. They are akin to the canary in the mine for our species. They have no visible definition and serve to reflect the rest of us in our experience and expression.

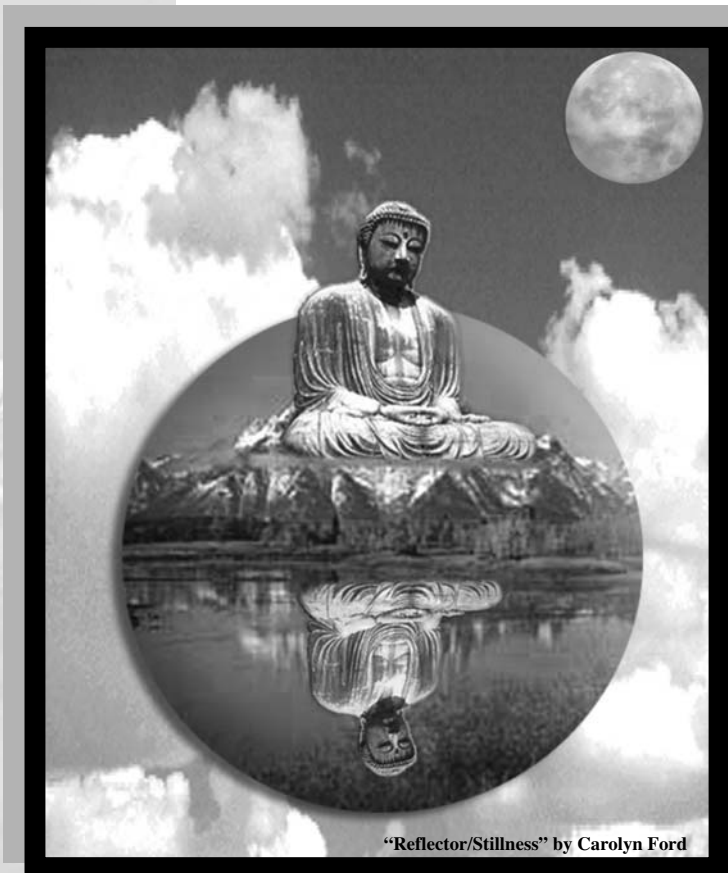

### HOW ARE WE DOING AS A WHOLE? CHECK OUT YOUR LOCAL REFLECTOR!

The Reflector has one constant- the movement of the moon and its 28-day-cycle. The moon in her grace is the consistent source of identity for the Reflector. During this 28-day-cycle the moon meets the Reflector in the same places within their design for the entirety of their life. This gives them a unique wave of definition that they can begin to recognize themselves. The strategy for reflectors to be clear and make reliable decisions is to wait out this 28-day-cycle of the moon, and then make a decision. Every 28 days for them equals one of ours in terms of meeting ourselves.

Reflectors come into the world full of wonder, they carry a natural deep mystical potential that is effortless and natural. Nurturing and loving these beings allow themselves to prosper in their natural role or place in this life. In our current evolutionary time this support for a Reflector does not happen easily or often enough. The result for them is disappointment. Ask a reflector, if you can find one, they all say the same thing: *people are a source of great disappointment*. They consider consistency to be a most cherished quality in others. They will hold on to their relationships with great zeal. The other 99% of us is what they most desire in order to feel whole and metabolize life.

### CAN I BE MYSELF?

The big question for a reflector is always: "Can I be myself?" There is a unique "Being" existing within the Reflector and it is important to enlighten them to this fact. There can be a great sigh of relief when they begin to be aware of their uniqueness and their role in life. So often, Reflectors feel invisible, since there is nothing to sink their teeth into within their immediate design as their true-form reveals itself within the 28-day-cycle of the moon. This takes time and reflection! It also requires that they learn not to identify with those in their life, simply enjoy and reflect them. Our society has set us up to think we are supposed to be something and we are not whole without that potential of identification. Just knowing this small piece of their design can bring immense peace to the Reflector. Where the Reflector struggles is to not only know this, but truly integrate what it is to play such an immense role for society and then be patient in waiting for the rest of us to realize their value. They are the only type that can actually experience what it is to be every other type. Shape-shifters on the wave of life, it is a joy to watch a healthy Reflector in action, here is the potential for true mastery.

"Reflector/Stillness" by Carolyn Ford

### THE PATH OF THE REFLECTOR IS THE PATHLESS PATH

If you find yourself to be fortunate enough to have one of these precious beings as a child in your care, love, nurture and teach them the value of their design. For the path of the Reflector is the Pathless Path. They are potentially unlimited in what they can bring to us through their openness. They are considered among the most gifted people we have in our society today. They are truly unlimited when properly loved and nurtured. They must be careful in choosing friends, lovers and careers as the people in their lives are what define and bring them to their destiny.

### RELATIONSHIP WITH REFLECTORS

If you find yourself in a relationship with a Reflector it may very well be a love affair with oneself. Technically, what you are getting back from them is simply yourself. It may be an opportunity to know and experience yourself in a very

deep and profound way, giving you a new and enlightening experience.

Reflectors are always at the mercy of the person they are in relationship with. The design of the other will always be the primary influence. For this reason, Reflectors often think others are often trying to control them. This is not necessarily true once they realize who they are, or are not, as the case may be.

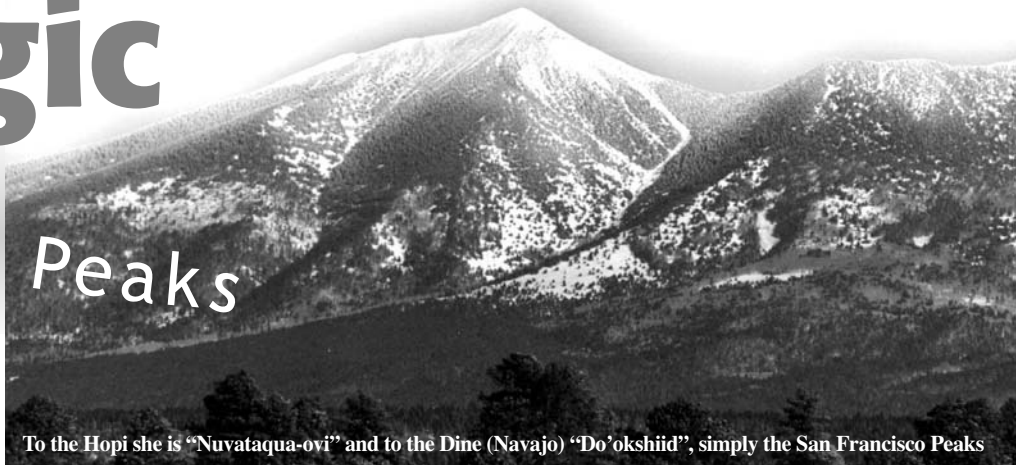

### KNOWING YOUR TYPE?

The first step to self-discovery, is in knowing your type. There are four basic types. Manifestors are 8% of the population. Projectors are 21%. Reflectors are 1% and finally the Generators are the largest coming in at 70%. An individual's personal design is calculated through, birth date, time and place. For a free chart please e-mail your data and I will send you your chart revealing your type and strategy.

## Save the Peaks

To the Hopi she is "Nuvataqua-ovi" and to the Dine (Navajo) "Do'okshiid", simply the San Francisco Peaks

photo by Martin Gray

The crown jewel of mountains in the Southwest is just north of Flagstaff. To the Hopi she is Nuvataqua-ovi" and to the Dine (Navajo) "Do'okshiid". The San Francisco Peaks have been honored as sacred for millennia by 11 other Indian tribes. She is the local snow and rainmaker gathering the clouds to bless the land and all those on it. Traditional herb gathering is done there. Prayers go to her from all directions.

Earlier this year all proposals to expand the development on the Western side of the Peaks were approved by the Forest Service. These include 66 more acres to be deforested for ski trails and the making of snow with "reclaimed" water from the city of Flagstaff. This water contains unknown amounts of chemical and biological contaminants which may cause endocrine disruption in plants, animals and/or people. This production of "yellow snow" will also fail to recharge the groundwater system as scientific studies show that 2/3 of this will sublime and go into the air. At a time when relative drought and water rationing are becoming the norm, it makes common sense to utilize our water resources as if our lives really depend on it.

The 13 tribes and environmental justice groups are appealing this in court. The case began in Prescott last month. They will need greater organizational capacity and financial help to be successful in stopping the degradation of this vital wilderness area. This is going to be a benchmark case to determine what degree of respect sacred sites will have across the country for many years to come.

**"We are not the weavers of the web of life, but merely a strand in it. What we do to the web, we do to ourselves."**  
**-Chief Seattle**

Help save the Peaks for future generations. Ho!
