

## EVENTS

### A Cruise for Spiritual Movie Lovers

The 2006 Spiritual Cinema Festival-at-Sea will be a week of film, community, beauty, creativity and fun! The festival, taking place on Holland America's M/S Oosterdam, will depart from San Diego, April 22-29, 2006. The festival features 25 hours of screenings and Q & A discussions with filmmakers on a cruise through the Mexican Riviera!

The Spiritual Cinema Festival at Sea is a unique floating festival that celebrates films that inspire and take us on a magical journey through the limitless depths of our hearts and souls.

Special guests include bestselling author Neale Donald Walsch and director Stephen Simon. Join them and be the first to see segments of the film CONVERSATIONS WITH GOD. This powerful, mystical, controversial and surprising film this will be in theaters Fall 2006.

Spend a week with like-minded people from around the world to watch films about life, love, art and transcendence, and share a week of screenings, snorkeling and spiritual community building. It will be a magical experience for all who attend.

### Join Drs. Deepak Chopra and David Simon for six days of bliss. You will never be the same.

What is Seduction of Spirit? For more than ten years, the Chopra Center presents Seduction of Spirit, the most profound spiritual experience offered. This extraordinary meditation retreat offers tranquility, peacefulness, discovery, and inspiration.

Your journey begins at 7am with Yoga instruction and meditation. Then, the co-founders of the Chopra Center—Deepak Chopra and David Simon—guide you through a daily practice of mindfulness, visualizations, the Law of the Day, and deep meditations. Dine on optional vegetarian Ayurvedic lunches designed from the Chopra Center cookbook. Deepak and David lead afternoon sessions which include immersion into the Spiritual Law of the Day, dancing, intimate interactive exchanges, rounds of meditation, and deep searchings of the soul. Your day concludes with beginner and advanced Seven Spiritual Laws of Yoga instruction; every evening is filled with an opportunity to share experiences with others in your group or join in the evening's activity. We've chosen these venues because of their magnificent connection to nature and their ability to effortlessly let you connect to yourself.

## ON THE COVER

### Matthew Smith: Cover Artist

Matthew leads the viewer through various passages of a physical, spiritual and sometimes surreal nature. His understanding of these passages was inspired by the island home of Maui where Matthew grew up. His respect for nature, the sea, the mountains and the power and color of nature at its finest all inspire Matthew in his creative journey through life.

This month Matthew's image **First Born** graces the cover of Four Corners Magazine. This image depicts the connection between mother and her first born child. The cloak that covers them both represents this bond and unites them as one. The horses signify the spirit and energy that surround this first born child and they also represent the strength and power of the life force within. The Kachina is passing down ancient spiritual and cultural knowledge to the child to solidify his foundation and to lay his life's path. In all this piece embodies, the miracle of life and the unbreakable bond between mother and child is love in its purest, simplest and most powerful essence.

### L.J. Chabot Ph.D. LCSP (phys), a Hands-On Medical Intuitive

offers an Integrated Multi-Systems Approach for the treatment of pain, dis-ease and dysfunction. For the past eighteen years, L.J. Chabot has provided a unique approach to healing problems such as digestive disorders, head injuries, seizure disorders, bladder incontinence, cardiac, respiratory and spinal syndromes.

What makes a Multi-Systems Approach work more effectively is that it addresses all the different systems that interact within the body. The human body is composed of many or several interdependent and interactive systems which must constantly interface with each other in a state of co-operation, in order for the healing response to fully engage and the condition of health and rehabilitation to evolve.

Structure dictates function...for a therapy to be successful in really assisting someone in a state of pain, dysfunction, disability, and limited function. The therapist must have many tools/therapies that are able to access and treat each independent systems involved. For that therapist to be able to identify the systems involved, the appropriate diagnostic and palpatory skills are essential.

If you have pain or any conditions that are persistent, unrelenting or unexplained...been everywhere and still aren't satisfied, Dr. Chabot can help.

"Having tried almost everything possible to relieve my suffering, I can say that Dr. Chabot's healing is the first I have experienced that has produced tangible and lasting results." - Client from Santa Fe, NM
